Profile

Frontend developer with 3+ years in enterprise teams, with backend experience enabling me to contribute across the stack. Core stack: React, Angular and TypeScript. Experienced in complex data interfaces, design systems, web accessibility (WCAG) and third-party SaaS customization. Next.js and backend skills in Python and FastAPI built through personal projects. Currently exploring agentic engineering and AI-assisted development. I clarify what a feature really needs, work closely with designers and other developers, and follow it from design through to implementation.

Skills

Frontend: React, Next.js, Angular, TypeScript, JavaScript, HTML, CSS/LESS, Redux Toolkit, TanStack Query, Zustand, Yup, RxJS, Storybook

Backend: Python, FastAPI, PostgreSQL, SQLAlchemy

Web & APIs: REST APIs, WebSockets, API Integration, Axios

Architecture & Quality: Reusable UI Components, Design Systems, Web Accessibility (WCAG), Jest, Pytest

Tools & Practices: Git, Docker, Vite, Webpack, Jira, Figma, Copilot, Claude Code

Soft skills: Agile/Scrum, cross-functional teamwork, mentoring, technical leadership

Languages

English - upper-intermediate · Norwegian - intermediate · Ukrainian - native

Work Experience

Software Engineer (Consultant)

nov 2022 – jan 2026

EPAM Systems (global digital engineering company, 60,000+ employees in 55+ countries)

- **SaaS Customization for a global B2B software leader (Fortune Global 500):** rebranded and extended third-party RainFocus portals for registration (in-person and virtual), live broadcasts and in-session chat across an international conference series. Extended platform behaviour through client-side scripting and deep style overrides, fixed vendor defects, enforced brand guidelines. Independently shaped the design and implementation of selected non-customer-facing pages.
  Applied technologies: JavaScript, LESS, RainFocus, Webpack
- **Enterprise Event Microsite Platform:** built reusable, accessible React components and design-system tokens inside Adobe Experience Manager for the same conference series (hybrid events in multiple cities; flagship event: 28,000+ attendees in person and online). One of four frontend developers in a cross-functional team of nineteen.
  Applied technologies: React, Redux, Storybook, LESS, AEM
- **Data-Intensive Defense Analytics:** built search and interactive mapping modules with advanced query-filtering over Elasticsearch APIs, network nodes visualised on maps.
  Applied technologies: React, TypeScript, React Leaflet, react-awesome-query-builder

- **Internal Assessment Platform:** developed and maintained EPAM University's long-running student assessment platform (new features, testing, bug fixing, code improvement); conducted demos and served as Scrum Master for one sprint.
  Applied technologies: Angular

Internal projects

- Progressed from **Angular Developer to Angular Team Lead and Technical Expert** across EPAM IT Marathons (2023-2025), building MVPs from scratch; led three frontend developers supporting a public development programme with ~2,000 participants, and gave a technical session on EPAM's YouTube channel.
- **University Mentorship:** designed and taught a React fundamentals course for ~40 third-year CS students at Alfred Nobel University (10 lectures and 10 workshops per group, final exam).

Agency Group Manager / Insurance Specialist

dec 2010 – nov 2021

Universalna Insurance Company (Fairfax Financial Holdings), Ukraine

- Led an agency group for the full eleven years and grew personal sales 20×.
- Trained agents and network partners including a leading fuel retailer and the national postal operator (coaching and group sessions for up to 100 people); expanded the partner network across banks and car dealerships; led tender bids and B2B/B2C client relations.
- Moved into software engineering in 2021 through full-time retraining.

Personal Projects - backend practice alongside frontend work

Async Contacts REST API - FastAPI, PostgreSQL, Docker

Production-ready async backend service: JWT authentication, email verification, rate limiting (SlowAPI), layered Repository/Service architecture on SQLAlchemy 2.x with Alembic migrations and Pydantic v2 validation, containerized via Docker Compose.
github.com/Ponomaleks/fastapi-contacts-api

Education

2025 – online — **MSc in Computer Science: Software Engineering and AI**
Woolf University, Malta

2004 – 2009 Ukraine — **Master's Degree in Process Automation and Control**
Ukrainian State University of Chemical Technology
Recognized in Norway as equivalent to a Norwegian short master's degree (HK-dir)

Courses

feb 2026 - **Norwegian** - Nittedal voksenopplæring

2022 – 2023 **Frontend Developer (Angular)** - EPAM University, Ukraine, online

2021 – 2022 **Full-Stack Development (React, Node.js), certificate** - GoIT, Ukraine, online

Community & Volunteering

Elected member of a local municipal council; ran regional youth and community programmes.
Organised English courses for displaced children.
Animal fostering and welfare initiatives.
